WHAT WE DO

procharter.com

Founded in the UK by RAF (Royal Air Force) veterans, ProCharter is a 'global aviation and logistics' service and support company that provides solutions tailored to an international client base.

ProCharter's portfolio of services covers a diverse but specialized product range, from a 'one-off' charter request to the complete management of complex airlift operations for civilian and military clients.

With core competencies in remote site aviation and logistics, aircraft charter, aircraft leasing, and air cargo solutions, ProCharter prides itself on providing our customers with rapid and cost-effective solutions.

ProCharter's transparent approach to business, focus on customer service, and operational excellence is a testament to our professionalism and company ethos of 'customer first, excellence always'.

REMOTE SITE OPERATIONS

procharter.com

REMOTE SITE OPERATIONS

Aviation and Logistics Solutions Tailor Made

ProCharter has a longstanding history of supporting military and commercial remote site operations with dedicated teams of experts that have extensive on-the-ground experience.

Boots on the Ground

We have the ability to draw upon dedicated and reliable staff who can provide a comprehensive range of aviation and logistics services. ProCharter has deployed teams of specialists in various regions, including Africa, the Middle East, and Central Asia, over the years to support humanitarian, government, and military operations. These locations include Afghanistan, Iraq, and Somalia, totaling over 4,500 flights, which include 1,500 helicopter missions, along with ground and sea transport.

Managing Aviation Assets and Logistics

Our team will identify and implement the most suitable solutions for each customer's requirements. Assigning a dedicated Operations Manager to oversee daily project management, with support and backup from the team in Dubai, ensures that all project aspects receive meticulous attention to detail.

AIRCRAFT CHARTER & LEASING

procharter.com

AIRCRAFT CHARTER & LEASING

ProCharter is an expert in short- and long-term aircraft leasing and has developed a portfolio of aircraft leasing services for both lessors and lessees. We have an in-house database of worldwide carriers that ensures we offer the optimum solution for every request.

ProCharter collaborates with the industry's leading ACMI aircraft suppliers and operates thousands of hours annually on behalf of our esteemed clients. ProCharter possesses comprehensive expertise in all facets of aircraft leasing, complemented by substantial purchasing power.

A clear understanding of the customers' supply chain needs and an in-depth analysis of our operating regions ensures we consistently offer the most efficient and cost-effective aviation solution.

For all your passenger and cargo aircraft charter requirements, the ProCharter team will be able to identify the most efficient and cost-effective solutions.

LOGISTICS SOLUTIONS

procharter.com

LOGISTICS SOLUTIONS

The word 'logistics' covers a wide range of activities and service requirements. Our staff have a wealth of knowledge in commercial and military logistics, and this experience makes us stand out from the rest.

ProCharter provides fully integrated multimodal logistics solutions to its client base of civilian and military organizations. Our team has developed a network of key service providers, with a global reach, which allows us to provide creative and cost-effective solutions.

We have experience operating in remote, challenging, and hostile areas, where we can mobilize highly skilled operations managers to oversee complete projects.

Recently we provided a multimodal solution to move oversized cargo from the manufacturer in the USA to the end user in Somalia, using a combination of a scheduled freighter to the UAE, a shipping line to Mombasa, and then a down-to-Mogadishu, ending with a truck service to the final location.

Another project in Oman required us to source up to 100 vehicles of various sizes and manage that fleet over 4 months, with many additional and unexpected 'curveball' requests thrown in, such as organizing road convoys, cranes, and shipping. Our team on the ground received laudable praise from our customer for their dedication and ability to think creatively.

NGO, GOVERNMENT AND MILITARY

Air Transport Is A Vital Link In The Global Supply Chain

ProCharter's dedicated team can enable the rapid delivery of mission-critical supplies to military forces, government contractors, and energy sector clients. Our team of professionals has a proven track record of successfully providing airlift services to NATO, the United Nations, US, and UK military forces. Specializing in both rotary-wing (helicopters) and fixed-wing aircraft operations, ProCharter has extensive experience in the hub and spoke concept and the demands of working at remote site forward operating bases.

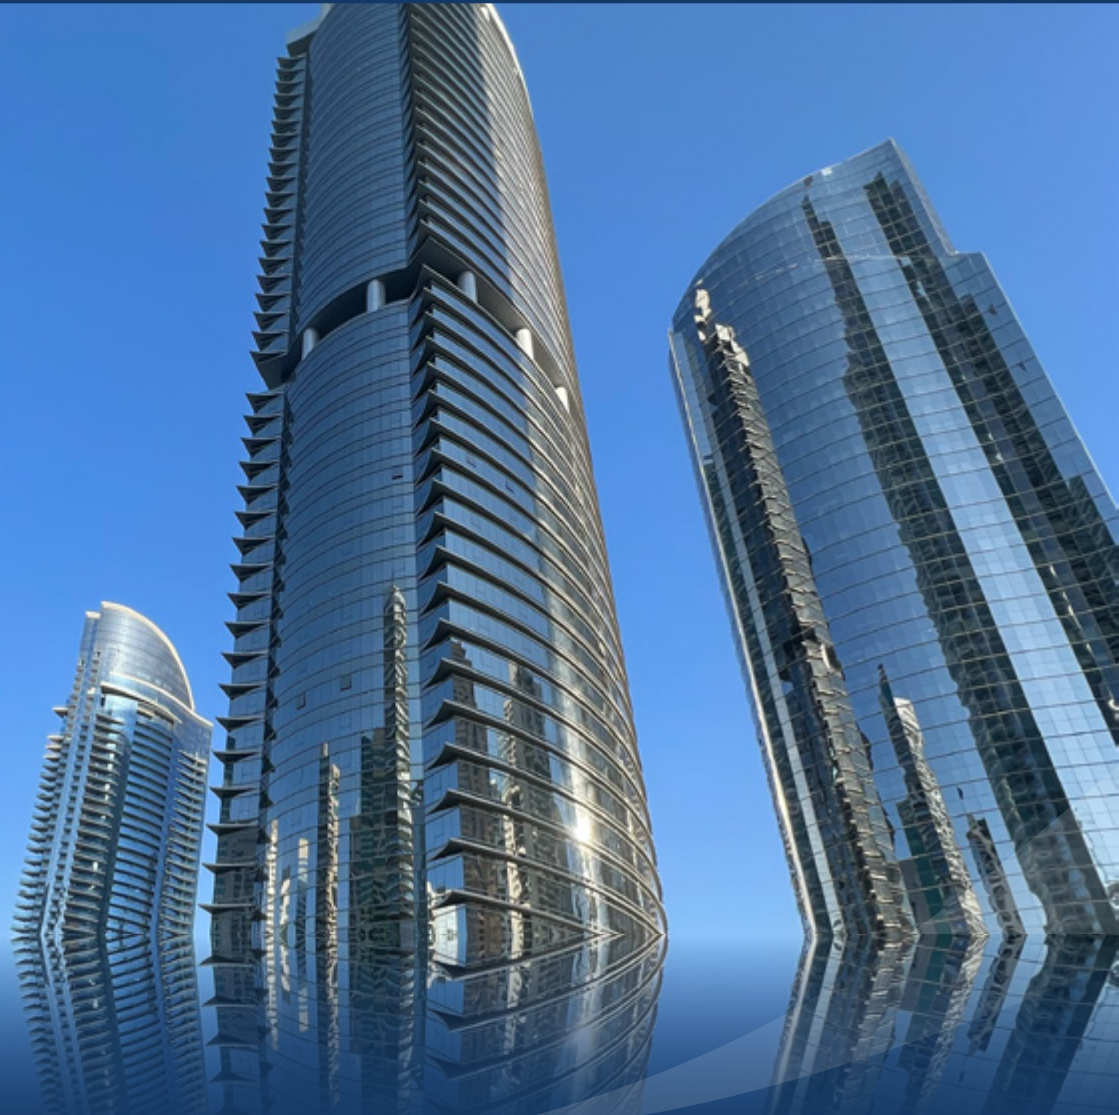

Dovetailing With Military Staff

Our operations team has an extensive military background and understands the need to follow a chain of command and standard military operating procedures. Knowledge of military aircraft, including the C17 Globemaster and specialized ground equipment, offers customers the opportunity to outsource their manpower requirements with minimal management oversight.

Remote Site Deployment

Operations in hostile or inhospitable environments often cannot rely on traditional aviation and logistics infrastructure. In these cases, our team will coordinate with civilian and military organizations to assemble an alternate base of operation on or within range of a remote site location.

AVIATION AND LOGISTICS CONSULTANCY

In these challenging times, our 'customer first' philosophy leads our approach and advice to our customers. With industry-specific experience, we guarantee to deliver significant cost and revenue benefits, over and above your current achievements.

With specialist in-house aviation & logistics consultants, we fully understand 'our market' and can therefore quickly identify short-term improvements, in tandem with adding structure and good practice to ensure tangible long-term benefits.

Our senior management and consultants have held key positions with various airlines, aviation and logistics companies. When we say we have been there, we really do mean it. Having restructured and merged airlines, identified and introduced new aircraft types, re-planned route networks and profiled aviation capacity, we have a solid in-depth knowledge of commercial aviation and logistics.

Our team works closely with our customers to provide effective consultancy services and guide them through every step, to ensure all their needs are met, and detailed operational and financial reports and plans are provided.

Our integrity and transparent approach to business helps us to build relationships and provide business solutions that are driven through peak performance and efficiencies identified within primary activities.

These attributes allow us to demonstrate exciting new solutions and opportunities for our clients.

AIR CARGO SOLUTIONS

procharter.com

AIR CARGO SOLUTIONS

With a Passion for Air Cargo and Service

ProCharter strives to provide the most innovative and cost-effective solutions to our global client base. Whatever you need to move, we will deliver, worldwide, on time, and on budget.

Project Cargo

Project cargo is a highly specialized field that covers shipments with unusual characteristics. These items can be of a unique size, shape, or weight. Often out of gauge, they are not compatible with standard aircraft unit load devices or scheduled airline services. Our specialist team can identify, plan, and offer efficient solutions to all your cargo needs.

Cargo Logistics Management

A thorough knowledge of geographic viability and destination infrastructure limitations, as well as critical experience in intermodal transportation and documentation, will ensure your cargo is shipped internationally without delay.

AOG (Aircraft on Ground) Solutions

When your aircraft is disabled, we stand ready to help you return it to revenue service. Our team of specialists operating across Europe, Africa, the Middle East, and Central Asia are available to offer you efficient and timely solutions.

AN-124 OPERATIONS

procharter.com

AN-124 OPERATIONS

Our partners provide us with the opportunity to offer bespoke airlift solutions to many industry sectors. This provides ProCharter with a unique exposure to 'one-way' AN-124 availability, along with other aircraft for project cargo.

Our access to, and vision of, reduced-cost charter flights should make us your first call for oil & gas, remote site construction, and humanitarian, government, and military contracts.

The Antonov AN-124's versatile cargo capacity for heavy lift or out-of-gauge cargo is often the solution that keeps your business running on track.

PROCHARTER AVIATION SYSTEM [PAS]

procharter.com

PROCHARTER AVIATION SYSTEM [PAS]

Multimodal Aviation and Logistics

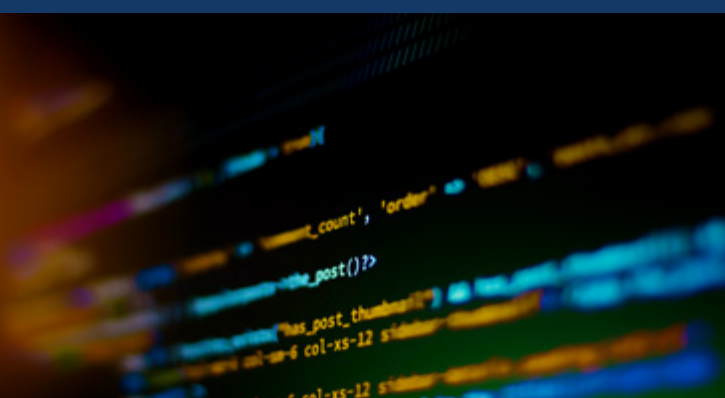

PAS (ProCharter Aviation System) is a multimodal system that captures each movement, whether that is by air, land, or sea.

The Right Tool For The Job

Our bespoke aviation and logistics system ensures that the customer has real-time oversight and reporting of their aviation and logistics activities managed by ProCharter. Details like aircraft type, call sign, flight times, destinations, cargo type, weights, fuel uplift, and much more. In addition to maintaining a complete date order record of all flights booked and flown, the system has per-flight document and invoicing functions. This allows our operations team to upload the charter contracts, fuel invoices, and other data that is vital to producing and maintaining accurate financial records necessary for mission-critical audits.

PAS is and will remain a cornerstone of our business to meet your needs.

* The host system is in a secure ISO/IEC 27001 and PCI DSS certified facility.

A woman with long blonde hair, wearing a blue dress and high heels, is sitting in an orange armchair. She is positioned in front of a private jet with its cabin door open. The jet is white with blue accents. In the background, there is a sign on a stand that reads "14 YEARS PROCHARTER" with a star and wings logo. The website "procharter.com" is visible in the top right corner of the image area.

PRIVATE JET

procharter.com

PRIVATE JET

Private jet charter and leasing solutions for business and events ensure you arrive in style, comfort, and safety. We provide a wide range of options for private, commercial, and government clients. Whether you're traveling to a well-known destination or off the beaten path into hostile, austere, and challenging environments, we'll find a solution for you.

Private Jet Charter for Business and Events

Arriving on time, rested, and prepared gives your business a competitive edge – one that scheduled commercial flights can't provide. ProCharter considers every aspect of your needs; use your flight time to maximum efficiency, reducing executive downtime so you arrive at your destination refreshed and ready to do business.

Private Jet Charter for Time-Critical Services

Time-critical delivery. When you or your company requires speedy delivery or timely action for those last-minute emergencies, you need a time-critical delivery service that is prompt and reliable. Whatever you have to move: personal possessions, industrial components, urgent documentation, or essential parts around the world.
